Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 June 2006.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Munzberg (EP A 0 534 290), cited by applicant.

Munzberg discloses, in figure, a high frequency device for a vehicle antenna comprising a circuit board 1, wherein the circuit board having a recess extending transversely of a curved surface.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over 10/299,870 (US Patent 6,166,698), cited by applicant, in view of Leong (US Patent 6,762,562).

Turnbull et al disclose, in figure 3, an antenna device mounted on a windshield of a vehicle comprising a multi-layered circuit board contained an antenna element 50 and circuits 80. The patent to Turnbull et al also teaches that the microwave antenna 50

could be provided on a non-planar substrate thereby allowing greater flexibility in the mounting of the antenna, see column 6, lines 61-64. The patent to Turnbull et al differs from the claimed invention because it does not disclose the recess formed on the circuit board. Leong discloses, in figures 1 and 2, a flexible circuit board 34 mounted on a tubular housing 24. The patent to Turnbull et al also teaches that the main outer tubular housing can be provided any shapes and a plurality of slits or recesses provided an the flat flexible circuit board allows to fit the circuit board into the curvature of the main outer tubular housing, see column 7, lines 54-59. Therefore it would have been obvious to provide the antenna circuit board of Turnbull et al with the recess for the purpose of fitting the circuit board to the curvature as taught by Leong.

5. The patents to Ooe et al and Sievenpiper et al are cited as of interest showing the antenna disposed on the vehicle similar to that disclosed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822. The examiner can normally be reached on M-F (8:00AM - 5:00PM).
